Customer CQC inspection published 14th March 2019:

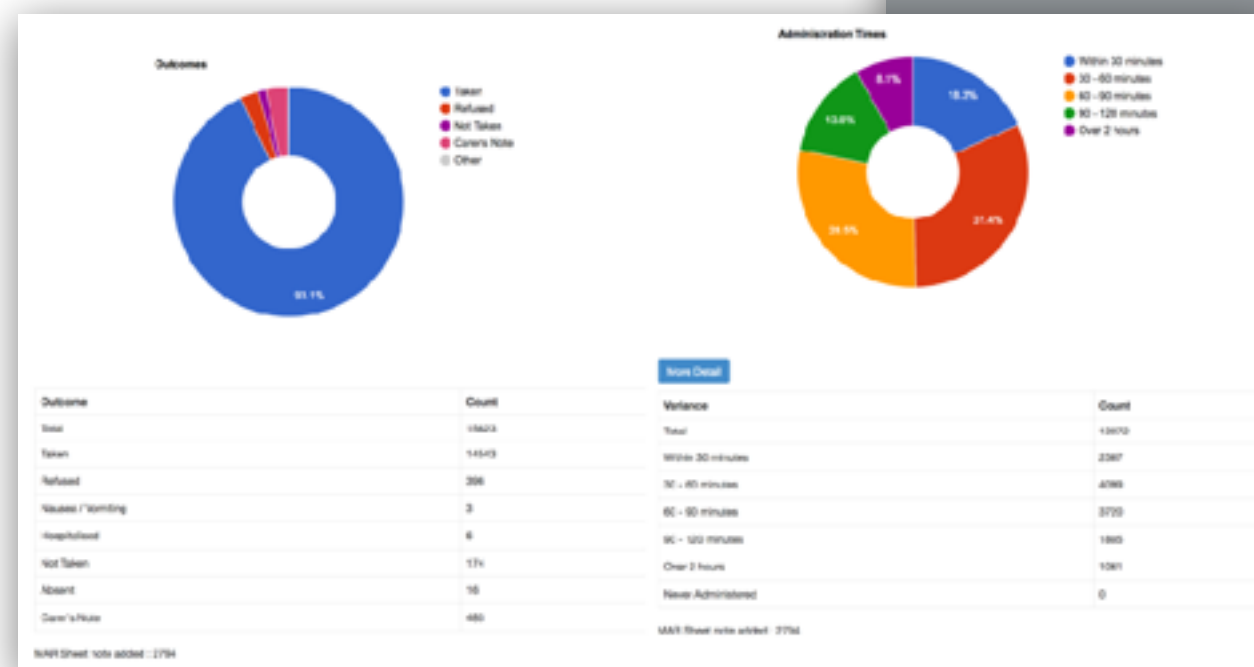

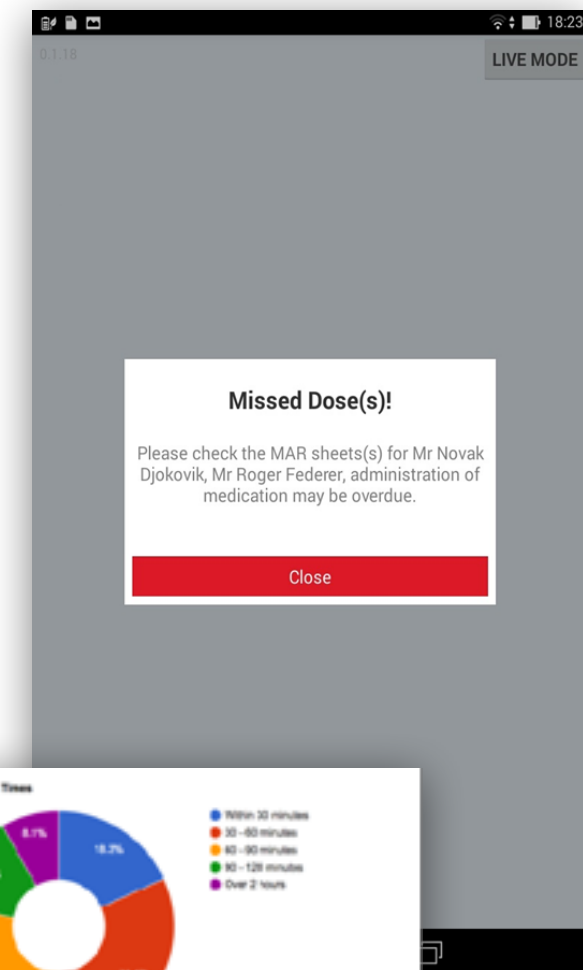

*“The service had **introduced the electronic mar system** for the recording of medicines administration. The system highlighted if medicine records were not completed which **reduced the risk of medicine errors.**”*

Real-time alerts preventing errors

Alerts:

- Direct to device, wake from sleep, audible alert sound, screen lights up, snooze function.
- Email alerts to senior team, time configurable
- Dashboard MAR sheet review
- Instant performance reports (time taken / outcomes)
- Audit compliance /
- remote monitoring

Who are we?

We are the creators of
Electronic MAR.

Electronic MAR is a groundbreaking digital version of the paper Medical Administration Record Sheet (or MAR Sheet).

We help customers in Residential Care, Nursing Homes, Supported Living, Mental Health, Re-ablement, Rehabilitation, Brain injury, Live-in, Extra Care and Domiciliary Care.

The screenshot displays the Electronic MAR mobile application interface. At the top, it shows the user 'admin1' and a status 'Last sync successful'. Below this, the date range is set from 'START DATE: 6 Apr 2016' to 'END DATE: 3 May 2016'. The main section lists medications with their administration schedules:

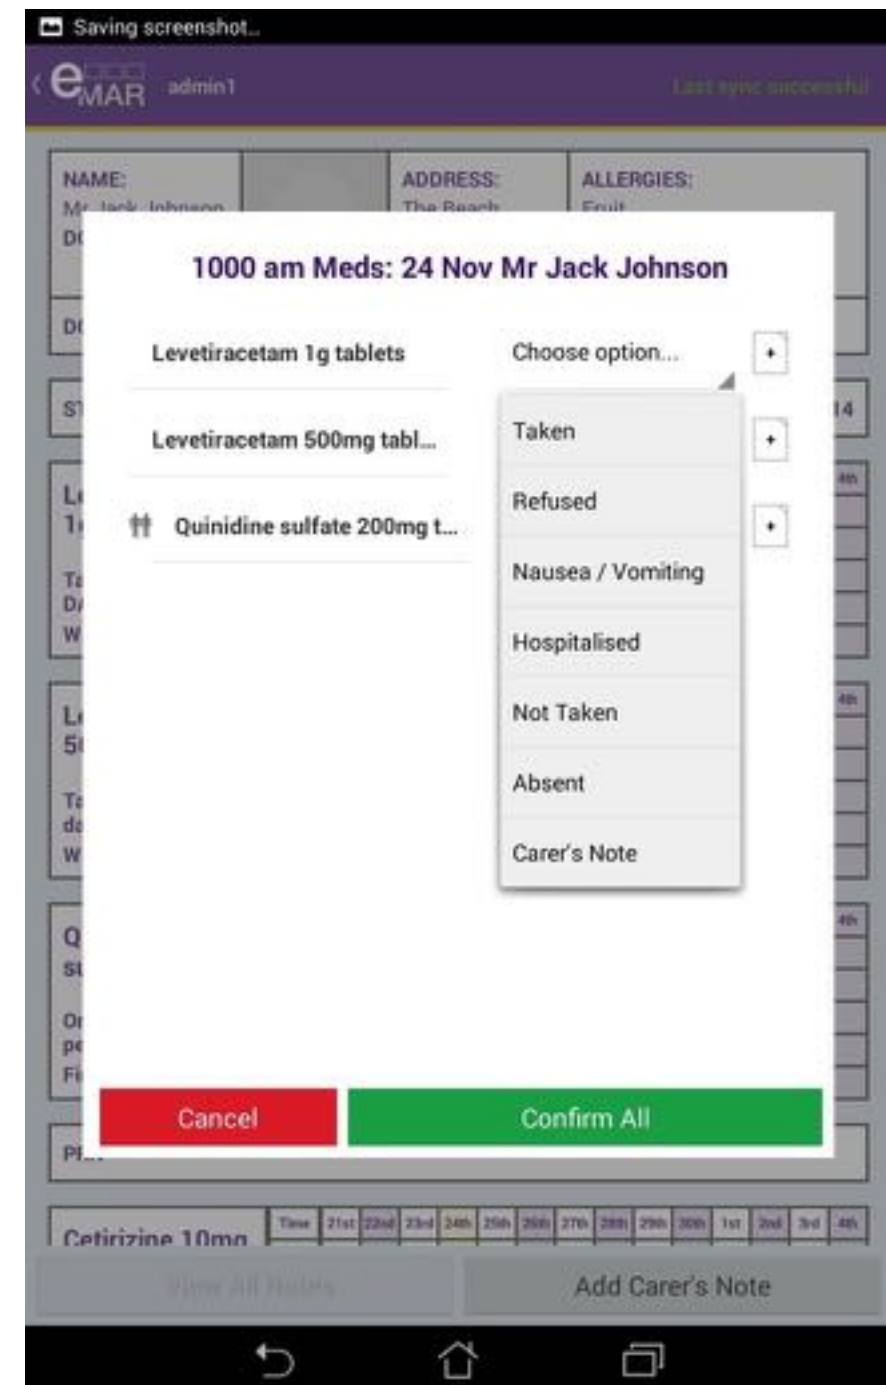

- Fluoxetine 20mg capsules:** ONE to be taken DAILY. The schedule shows daily administration from 0930 to 27th, with a red 'A' indicating a missed dose on the 17th.
- Risperidone 1mg/ml oral...:** Take 1ml morning and 2mls night as... The schedule shows two daily doses (0930 and 2100) from 14th to 27th, with a red 'A' indicating a missed dose on the 17th.
- Risperidone 2mg tablets:** The schedule shows two daily doses (0900 and 1300) from 14th to 27th.
- PRN:** A section for PRN medications.
- Doublebase gel:** Apply when required. The schedule shows administration from 14th to 27th, with a red 'A' indicating a missed dose on the 17th.
- Lorazepam 1mg tablets:** The schedule shows administration from 14th to 27th, with a red 'C' indicating a missed dose on the 17th.

At the bottom, there are buttons for 'View All Notes' and 'Add Carer's Note'.

Why are we the best?

Our product is designed to:

- Be easy to use, quick to learn
- Send alerts if medication is late
- Look like a MAR Sheet
- Send data to the cloud
- Speed up meds rounds
- Speed up back office functions
- Training included

We help you with these challenges:

Lots of missed signatures:

- Time is taken to get staff member in and have a meeting
- Count medications in cabinet to try and establish if there is a 'GAP'
- Time for retraining
- Double up on staff or suspend staff member
- Cost of short notice agency staff

Not many missed signatures:

- May check each MAR sheet every day or even every round
- Your most expensive staff member does this
- They should be doing something more useful - e.g. on the ward managing other staff
- May see a reduction in falls and other problems
- Spending a lot of time and money managing something software could manage for them

What do people say about us?

“Having done quite a lot of research about electronic mar charts and speaking to a number of companies out there in the market place, it was great to finally talk to someone who listened, understood what we needed and had a product that would fit what we needed it to do.”

Karen Clinical Director
Healthcare Group

“Lisa has been amazing in her education for myself and my nursing team, patiently walking us through each stage of set up, through to the launch and the continued support she has given in these first few weeks as we have got to grips with the system.

What has helped greatly has been her adaptability to fit in with our schedules.”

“The staff find it quick and simple to use and for us the visibility in real time of what is happening with medications in each client’s home has reduced our workload immensely...

They can’t believe we haven’t done this sooner.”

“The audit trail we now have is so transparent.

Case Study: “Now we don’t have to worry”

CARING SOFTWARE AND TECHNOLOGY

37

Advertiser's announcement

Katherine House – using Electronic MAR to make managing MARs easier ...

BRISTOL based care home Katherine House started using Electronic MAR six months ago with a view to making it easier for staff to record the administration of medicines to residents.

Electronic MAR is a simple piece of software loaded on to a tablet or phone that allows staff to record what medicines have been administered – and when – digitally instead of using a paper form.

Care home manager Vivienne Withers said: “Electronic MAR is incredibly easy to use. Our staff have picked it up very quickly – even those who aren’t particularly used to using technology.

“Now that using the digital record sheet is part of our daily routine we can train a new member of staff to use the product in around half an hour. The staff at Electronic MAR have been great in providing training to get us set up and have worked hard to tailor the product to our needs.”

Vivienne reports that medicine rounds are becoming quicker and that Katherine House staff “look very professional” when using their tablets to interact with residents.

She said: “Making the decision to invest in licenses for staff is part of our forward-looking ethos.

“We’re keen to be progressive and are always looking for ways to make

it easier for our staff to do their jobs and to help the residents. If new technology exists to make life easier then why wouldn’t we use it as long as costs are reasonable?”

As well as speeding up medicine rounds and making it easier for staff to complete the forms accurately and in a timely fashion Electronic MAR has also delivered management benefits for the Katherine House team.

“It is really easy to pull off all sorts of reports via the web-based portal,” added Vivienne. “We can now easily access useful management information without having to store bulky paperwork and manually

compile reports.

“As the reports are all formatted in a standard way it’s easy to spot any gaps and we now don’t have to worry about not being able to read someone’s handwriting...or whether medication has been administered. Electronic MAR makes it easy to see when medicine has been administered and in what dosage and provides a full audit trail too.”

To find out more visit www.electronicmar.co.uk to download an information sheet or contact us on 0117 911 3889 or on info@electronicmar.co.uk to arrange a visit or a free no obligation online demo.

Understanding and applying technology will be key to success in 2018 says CQC

UPDATED assessment framework guidelines issued by the CQC last month place a strong emphasis on the need for care homes and care businesses to utilise new technology in support of their residents.

The ability of care businesses to identify and adopt the latest technology is referenced across all of the main themes of the guidelines and is specifically cited as a critical factor in achieving a 'good' or 'outstanding' rating following an inspection.

In fact the 70-page document mentions technology in no less than 15 places. Examples of new questions added to the assessment framework and which will be used in order to determine your rating include:

- How is technology and equipment used to enhance the delivery of effective care and support?
- How is technology used to support people to receive timely care and support? Is the technology (including ... online/digital services) easy to use?
- Are information technology systems used effectively to monitor and improve the quality of care?

In the 'Safe' section one of the criteria considered in order to achieve an 'outstanding' rating is 'the service is using imaginative or innovative ways to manage risk, while supporting people to stay safe. The service actively seeks out new technology and other solutions.'

Electronic MAR managing director Chris Gledhill set up his technology business to support managers and directors of care homes in making the most of the latest software to meet these requirements.

Electronic MAR is a digital version of the paper MAR sheet that can be accessed via any tablet or smartphone.

Its innovative and easy to use design is quick to pick up, even for those

the consequences of making an error in administering medicines and of recording that activity incorrectly.

Swapping from time consuming, heavy and space-sucking paper record sheets to a digital version helps managers and directors of care businesses to avoid significant problems that can be caused by the incorrect administration of the records.

Adopting Electronic MAR is a cost effective way of avoiding gaps in MAR sheet records, missed signatures, missed medications, audits not tallying, incorrect storage of medication, CD book inaccuracies, medication rounds being disturbed, MAR sheets being filled in at the wrong time and PRNM protocols.

Chris said: "Having previously developed technology solutions that solved problems and helped organisations to run more smoothly I knew there was scope to use technology to help care organisations to administer medicines in a simpler, safer and most cost effective way.

"It's encouraging to see CQC acknowledging the role of technology in this way. Ultimately, if technology products such as Electronic MAR are used in the right way, then care businesses will run more efficiently and serve the people in their care better.

"As well as safeguarding patients

"Adopting Electronic MAR is a cost effective way of avoiding gaps in MAR Sheet Records, audits not tallying..."

CQC:

"How is technology used to support people to receive timely care?"

Thanks for your time!
